MY WHY

I am passionate about helping others find solutions and make their industry processes easier to manage. I create and deliver clean and quality software solutions and I am confident my skills and values would be an asset to a strong and well valued company. It would be an honor to have the opportunity to be a part of an inquisitive development team.

HOW I CAN ADD VALUE

My true passion is creating new and innovative software solutions for clients to implement and interact with through front-end development.

My areas of expertise include quality Full-Stack applications designed specifically for clients needs. Attention to detail and meeting deadlines is my strong suite as well as collaborating effectively in a team setting using efficient GitHub practices. I'm constantly learning about new ways to improve the performance of my applications and regularly practice reusability and testing throughout my work. My **technical skills** include:

   JavaScript | ES6 | React | HTML | CSS | Node.js | Express | AJAX/HTTP | Mongoose | MongoDB | JSON | Git

WHAT I'VE LEARNED

Certification of Web Development, V School   2021-2022

Bachelor of Science in Business Administration, Coastal Carolina University   Grad: Aug 2019
AACSB - Accredited
Major: Management, Minor: Entrepreneurial Management

PROJECTS I'VE DONE

Youth Softball Website | github.com/Jaconn4242/Rocks-Spring-Angels | TECHNOLOGIES: **React, Node, Express, Mongoose, MongoDB**
- A responsive web/mobile app that allows users to identify upcoming softball game information and team player data for their local team(Rock Springs Angels).
- The client side is controlled by **React.js (v18.0)** utilizing custom hooks, Context, and React Router. A super admin was implemented for the Coach of the softball team to have full control of data being displayed to the viewers.
- The data is driven by two MongoDB cloud based API's to allow the changes made by the coach to be stored and displayed accordingly.
- Currently implementing Google Analytics and working with Google Tag Manager.

Bounty Hunter 2 - Tracker Tool |
github.com/Jaconn4242/assignments/tree/main/Level-5/Bounty-Hunter2 | TECHNOLOGIES: **React, Node, Express, Mongoose, MongoDB**

- Responsible for keeping track of a user's bounties and kills on their quest to avenge their parents in the thrilling Bounty Hunter 2 game.
- The backend consists of a custom built Express server utilizing strong error handling and demonstrating readable and asynchronous code by using the Axios http client to communicate the user's requests effectively.

WHERE I'VE BEEN

Sales Account Manager, AircraftDealer.com   November 2016 - Present
- Responsible for managing 90+ accounts, ensuring clients are satisfied, and generating new sales opportunities.
- Partnered with the company's senior web developer in launching a responsive geographical site page allowing users to locate flight schools in CONUS, generating higher web traffic and overall client exposure.
- Developed a pre-sale marketing solution that allows buyers and sellers to actively view and interact with their aircraft listings before publishing, resulting in a 40% increase in total sales for the year 2020.

Server, The Cliffs at Keowee Vineyards   October 2020 - November 2022
- Provided top-tier customer service for exclusive residents at high-end country club for the four-star fine dining restaurant.
- Coordinated and planned dining layouts for quarterly events for ~70 people with attention to detail.
- Developed long term partnerships with ~500 members, associates and vendors with a focus on "Total Wellness" for a client, resulting in continuous improvement of high-quality products and service.

Communications Chief, United States Marine Corps   November 2012 - November 2016
- Lead, mentored, trained, taught, and supervised ~30 marines who installed, operated, and maintained communication transmission, and data communication center facilities.
- Coordinated field operations with successful deployment of personnel and gear by inspecting all communication units to determine equipment and operational readiness.
